Re: Oklahoma Gas and Electric Company, Docket Nos. ER08-281-000 and -001; Informational Filing of Formula Rate True-Up Adjustment

Dear Secretary Bose:

Pursuant to the Formula Rate Implementation Protocols ("Protocols") contained in Attachment H – Addendum 2-B of the Open Access Transmission Tariff ("OATT" or "Tariff") of Southwest Power Pool, Inc. ("SPP") and Attachment H – Addendum 2-B of the Oklahoma Gas and Electric Company ("OG&E") OATT, OG&E hereby submits a True-Up Adjustment for the transmission formula rate for the partial rate year from July 1, 2008, through December 31, 2008. As described more fully herein, the True-Up Adjustment reconciles the Projected Annual Transmission Revenue Requirement ("ATRR") with OG&E's actual costs of service for the relevant period and provides for refunds as appropriate to implement that reconciliation.

As provided for by the governing Protocols, ¹ this submission is provided to the Federal Energy Regulatory Commission ("Commission") for informational purposes only. A copy of this filing will also be posted on the SPP and OG&E OASIS sites. However, this submission is not intended to be subject to the Commission's notice requirements, and it is not intended that the Commission take any action in response to this informational filing. In lieu of Commission-initiated procedures, the Protocols set out a detailed process that will enable interested parties to review and, if warranted, challenge aspects of the True-Up Adjustment, which may include the submission of Formal Challenges before the Commission.

I. Background.

OG&E is an electric public utility with plant, property, and other assets dedicated to the production, transmission, distribution, and sale of electric energy to wholesale and retail customers in Oklahoma and Arkansas. OG&E is a wholly-owned subsidiary of OGE Energy Corp. and is a member of SPP.

On November 30, 2007, OG&E made a filing under Section 205 of the Federal Power Act ("FPA") proposing tariff changes to implement a cost of service formula rate for transmission service provided pursuant to the SPP OATT within the OG&E pricing zone and pursuant to the OG&E OATT. On January 31, 2008, the Commission conditionally accepted the revised tariff sheets, suspended their effectiveness for five months until July 1, 2008, subject to refund, and established hearing and settlement judge procedures.² On February 5, 2008, the Chief Administrative Law Judge designated Administrative Law Judge Herbert Grossman to serve as Settlement Judge in these proceedings. On January 6, 2009, the Chief Administrative Law Judge designated Administrative Law Judge Michael J. Cianci, Jr. as the Settlement Judge, replacing Judge Grossman, who retired from the Commission effective January 2, 2009.

These negotiations were ultimately successful and on April 24, 2009, as amended by an errata filed May 14, 2009, OG&E filed a settlement agreement ("Settlement Agreement") in Docket Nos. ER08-281-000 and -001, on behalf of itself and Oklahoma Municipal Power Authority, establishing the Settlement Formula Rate, which consists of a Rate Formula Template and the Protocols.³ Under the Settlement Formula Rate, OG&E's ATRR is derived from a formula that tracks increases and decreases in actual costs and projected capital additions every year, subject to the True-Up Adjustment, through which amounts over-collected or undercollected are returned to or collected from customers, with interest in accordance with 18 C.F.R. § 35.19a. On May 14, 2009, Settlement Judge Michael J. Cianci, Jr. certified the uncontested Settlement Agreement to the Commission.⁴ The Settlement Agreement is currently pending before the Commission.

On May 11, 2009, OG&E and SPP filed with the Chief Administrative Law Judge ("Chief Judge") an unopposed joint motion for interim implementation of the Settlement Formula Rate. The Chief Judge granted the motion on May 20, 2009. Pursuant to that order, the Formula Rate established by the Settlement Agreement became effective May 1, 2009. Among other things, the Settlement Formula Rate contained the Protocols, which set out the terms and conditions applicable to annual True-Up Adjustments. This informational filing was

Oklahoma Gas & Elec. Co., 122 FERC ¶ 61,071 (2008). In this order, the Commission required a compliance filing, which OG&E submitted on March 3, 2008, and the Commission accepted on April 24, 2008. Oklahoma Gas & Elec. Co., Unpublished Letter Order, Docket No. ER08-281-001 (issued April 24, 2008)

Unless otherwise stated, defined terms have the same meaning herein as in the Settlement Agreement.

⁴ Oklahoma Gas & Elec. Co., 127 FERC ¶ 63,015 (2009).

Oklahoma Gas & Elec. Co., Order of Chief Judge Granting Motion for Interim Rate Relief, Docket No. ER08-281-000 (issued May 20, 2009).

prepared and submitted in accordance with the requirements of the Protocols contained in the Settlement Agreement.

II. True-Up Adjustment.

Pursuant to the Protocols, on June 1 of each calendar year (or the next business day if June 1 falls on a holiday or weekend), OG&E is required to calculate the Baseline ATRR for the Rate Year that has most recently concluded, reconcile the Projected ATRR with the Baseline ATRR for the corresponding Rate Year, and calculate the amount of any over- or under-recovery. These calculations, plus any corrections pursuant to Section 1.10 of the Protocols (concerning certain corrections to OG&E's FERC Form No. 1 or its books and records) or any changes to account for the resolution of any Preliminary Challenge, Formal Challenge, or a proceeding initiated *sua sponte* by FERC challenging a True-Up Adjustment, to the extent such changes have not been reflected in a prior Annual Update, constitute the True-Up Adjustment.

In accordance with Section 1.4(c)(1) of the Protocols, the True-Up Adjustment that is the subject of this informational filing is applicable to the rate period from July 1, 2008 (the date the OG&E Formula Rate became effective) through December 31, 2008, which is a partial rate year. The True-Up Adjustment has been computed as one-half (1/2) of the difference produced by subtracting the Baseline ATRR for calendar year 2008 from the Projected ATRR for calendar year 2008. This reconciliation quantified an over-recovery, which will be refunded in accordance with Worksheet L of the Rate Formula Template. The data-populated Rate Formula Template detailing the True-Up Adjustment is appended hereto at Attachment 1.

III. Other Information and Materials.

A. Supporting Information.

Much of the information contained in the True-Up Adjustment is taken from OG&E's FERC Form 1 for the year ending 2008. With regard to the "supporting information" described at Section 1.3(a)(2) of the Protocols, a data-populated Rate Formula Template in a fully-functioning Excel file is posted and available on the SPP OASIS, at http://sppoasis.spp.org/documents/SWPP/MemberRelatedPostings/MemberRelatedPostings.asp, and on the OG&E OASIS, at http://oasis.oge.com/Formula/FormulaDocs.htm. The Rate Formula Template, including associated workpapers, demonstrates and explains information not otherwise set out in OG&E's FERC Form 1. A side-by-side comparison of the of the Rate Formula Template components as compared to the most recent Baseline ATRR is appended hereto as Attachment 2.

Ms. Kimberly D. Bose, Secretary June 1, 2009 Page 4 of 5

B. Accounting Changes and Tariff Changes.

Section 1.4(b) of the Protocols provides that in each True-Up Adjustment filing OG&E shall identify and provide an explanation of any Accounting Changes and/or Tariff Changes, as those terms are defined therein. The True-Up Adjustment contains one accounting change. Specifically, OG&E has determined that certain ADIT costs related to the Kaw Water Lake Storage Agreement and investments in certain partnerships are not plant-related and that such costs should be included in Account 190 rather than in Account 282. In addition, because such costs are not plant related, OG&E has reclassified these costs as Non-Transmission related. As a result, all of the ADIT costs related to these items that were originally included in Account 282 have been removed from the calculation of OG&E's ATRR.

These adjustments are reflected in Worksheet C and in the worksheet appended hereto as Attachment 3. With regard to Account 282, the BOY balance for these items is \$3,134,958. The True-Up Adjustment averages this amount with a \$0.00 EOY balance to reflect the transfer of these costs to Account 190. With regard to Account 190, the EOY balance for these items is \$3,039,519. The True-Up Adjustment averages this amount with a \$0.00 BOY balance to reflect the transfer of these mounts from Account 282. The resulting averages of the BOY/EOY balances for Account 190 and 282 have been reclassified as Non-Transmission Related and are reflected in Column C of Worksheet C.

There have been no Tariff Changes to report for the True-Up Adjustment that is the subject of this informational filing.

C. True-Up Meeting.

Pursuant to Section 2.1(a) of the Protocols, notice is hereby given that the annual True-Up Meeting will be held from 1:00 to 5:00 p.m. (CST) on June 16, 2009, at the Business Resource Center at OG&E's Corporate Headquarters, 321 N. Harvey Ave., Oklahoma City, Oklahoma, 73102.

D. Service of Informational Filing.

In accordance with the Protocols, OG&E is providing the True-Up Adjustment and supporting information to SPP for posting on the publicly accessible portion of the SPP website⁸ and also is providing SPP the ATRR associated with each of OG&E's Base Plan Upgrades so that SPP can calculate Base Plan Zonal ATRRs and the Base Plan Region-wide ATRR.⁹ Also as required by the Protocols, OG&E has this date served the True-Up Adjustment and supporting information to SPP transmission customers taking Network Transmission Service on the OG&E

Notes

General Notes: a) References to data from Form 1 are indicated as: page#.line#.col.#

b) If transmission owner ("TO") functionalizes its costs to transmission on its books, those costs are shown above and on any supporting workpapers rather than using the allocations above.

Note Letter

- The revenues credited shall include a) amounts received directly from the SPP for service under this tariff reflecting the TO's integrated transmission facilities and b) amounts from customers taking service under grandfathered agreements. Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or facilities excluded from the definition of transmission facilities under this tariff shall not be included as revenue credits. Revenues from coincident peak loads included in the DIVISOR are also not included as revenue credits unless this revenue is offset by a corresponding expense. See Worksheet A for details.
- B The annual and monthly net plant carrying charges on page 2 are to be used to compute the revenue requirement for directly assigned transmission facilities, Base Plan Upgrades, Transmission Service Upgrades, Sponsored, Economic Portfolio Upgrades and Generator Interconnection Facilities, etc. whose revenue requirement is calculated in Worksheet G and recoverd pursuant to Attachments J and Z, or successor attachments, of the SPP OATT.
- This additional revenue requirement is determined using a net plant carrying charge (fixed carrying charge or FCR) approach. Worksheet F shows the calculation of the additional revenue requirements for each project receiving incentive rate treatment, as accepted by FERC. These individual additional revenue requirements shall be summed, for the relevant year, and included here. When calculating the Baseline ATRR, the "Relevant Year" is the year being trued-up. When calculating the Projected ATRR, the "Relevant Year" is the year being projected.
- D Reflects the transmission related portion of balances in Accounts 281, 282, 283, 190 and 255 as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and completely excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note M. Transmission allocations shall be shown on Worksheet C, including amounts excluded through direct assignment to incentive plant, as shown on separate workpapers.
- E Reserved for future use.
- F Identified as being only transmission related or functionally booked to transmission.
- G Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission on line 90. Prepayments are limited to electric related items.
- H Reserved for future use
- Only include transmission costs paid to others by the TO for which the transmission customer under the tariff receives a benefit (such as the payment of Base Plan Charges allocated to the TO's zone and not otherwise recovered by SPP from customers). Charges related to Base Plan Upgrades under Attachment J, Future Roll-Ins under Attachment Z and replacement of Existing Facilities are to be included. Direct Assignment Facilities, Economic Upgrades, Requested Upgrades and generator related to Network Upgrades (as defined in Attachment J) are to be excluded.
- J General Plant and Administrative and General expenses will be functionalized based on the indicated allocator on each line.
- K Includes all Regulatory Commission expense itemized in FERC Form 1 at 351.h. Show in Worksheet D how these expense items are allocated to transmission. FERC Assessment Fees and Annual Charges shall not be allocated to transmission. Account 930.1 shall Include only safety-related advertising cost booked to the account.
- L Includes only FICA, unemployment, highway, property and other assessments charged in the relevant year. When calculating the Baseline ATRR, the "Relevant Year" is the year being trued-up. When calculating the Projected ATRR, the "Relevant Year" is the year being projected. Gross receipts tax and taxes related to income are excluded.
- M The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) (In 112) multiplied by (1/1-T). If the applicable tax rates are zero enter 0.

Inputs Required: FIT = 35.00%
SIT = 6.11%

SIT= 6.11% (State Income Tax Rate or Composite SIT - Worksheet J)
p = 0.00% (percent of federal income tax deductible for state purposes)

- N Removes the dollars of plant booked to transmission plant that is excluded from the Tariff because it does not meet the Tariff's definition of Transmission Facilities or is otherwise not eligible to be recovered under this Tariff.
- O Removes the dollars of plant booked to transmission (e.g. step-up transformers) that are included in the development of OATT ancillary services rates and not already removed in Note N above.
- P Removes the dollars of expense booked to transmission accounts included in the development of OATT ancillary services rates, including all of Account No. 561.
- Q Long Term Debt cost rate calculated in Section V of Worksheet K. Preferred Stock cost rate = preferred dividends (In 131) / preferred outstanding (In 138). Common Stock cost rate (ROE) = 11.10%, the rate accepted by FERC in Docket No. ER08-281 It includes an additional 50 basis points for the TO remaining a member of the SPP RTO. This rate shall not change until a new rate is accepted by FERC in a subsequent filing under the FPA, including Sections 205 and 206. The percentage of equity used in determining the weighted cost of equity for OG&E for purposes of the Settlement Formula Rate shall not exceed 56% ("Equity Cap") as accepted by FERC in Docket No. ER09-281 regardless of OG&E's actual percentage of equity. To the extent OG&E's actual percentage of equity exceeds the Equity Cap, such amount in excess of the Equity Cap shall be treated as Long-Term Debt for purposes of the Settlement Formula Rate. The Equity Cap shall not change until a new Equity Cap is accepted by FERC in a subsequent filing under the FPA, including Sections 205 and 206. Include in the interest on Debt from Associated Companies only the interest on Long-Term Debt.
- R OG&E must make the appropriate filing at FERC before inputting or changing amounts on lines 60 & 94 (abandoned plant).
- S The Formula Rate will functionalize Material and Supplies for Construction on the basis of a single-year usage ratio in accordance with the most recent FERC Form 1, and will true-up these costs based on the trued-up year's Form 1. M&S for Construction will utilize 13 month average balances as reflected in Worksheet K, Section II and exclude any M&S booked in Account 107.
- T PBOP base amount, initially set at \$12,400,000, shall not be changed absent a separate filing made with the FERC.
- J Transmission Service Study and Generation Interconnection Study costs shall be recorded in FERC Accounts 561.6 and 561.7, respectively. Costs of studies performed by SPP on behalf of OG&E, costs of studies performed by OG&E at SPP's request, reimbursement of study costs from SPP for studies performed by OG&E at SPP's request and studies for OG&E's retail load shall be recorded in FERC Accounts 561.6 & 561.7. FERC Accounts 561.6 and 561.7 are excluded from the Formula Rate.

Notes - continued

- Accumulated Amortization for Intangible Plant shall be reflected as a Rate Base Adjustment under "Accumulated Depreciation".
- OG&E may only include the amortization of transmission-related extraordinary property losses if; (1) OG&E makes a filing with the Oklahoma Corporation Commission requesting approval for the new amount to be recovered and the amortization period and (2) OG&E makes a single issue FPA Section 205 filing that requests the same recovery treatment from the FERC. OG&E shall be obligated to make such a single issue FPA Section 205 filing whenever it requests amortized extraordinary property loss costs recovery from the Oklahoma Corporation Commission.
- SPP OATT Related Upgrades include Base Plan Upgrades, Sponsored, Economic Portfolio Upgrades, Transmission Service Upgrades and Generator Interconnection Facilities, etc. whose individual Revenue Requirements are calculated and summarized in Worksheet L. The sum of the individual Revenue Requirements is credited to zonal network customers on line 17 above.

NOTES:

- 1. Base Plan Upgrades and Economic Portfolio revenue requirement are estimates and will be trued-up to actual amounts in the True-up Adjustment
- 2. Base Plan and Economic Portfolio revenue requirements in the Summaries will be provided to SPP for their Cost Allocation calculations

Line

- II. Determine the Revenue Requirement for SPP OATT Related Upgrades including Base Plan Upgrades, Transmission Service Upgrades, Sponsored or Economic Portfolio Upgrades and Generator Interconnection Facilities.
 - A. Base Plan facilities.

NOTE:

- 1. To be included in transmission rate base, the land held for future use must be estimated to be in service within 10 years
- 2. When calculating the Baseline ATRR, use data from the year being trued-up to calculate "AVG BOY and EOY"; when calculating the Projected ATRR, use data from the most recent FERC Form 1 to calculate the "AVG BOY and EOY."

Worksheet J - Tax Apportionments by State

I. DEVELOPMENT OF COMPOSITE STATE INCOME TAX RATES

Line No.		For Tax '	Year 2007	
1	State Income Tax Rate - Oklahoma	Note 1	6.00%	
2	Apportionment Factor	Note 2	93.4%	
3	Oklahoma State Income Tax Rate	(ln 1 * ln 2)		5.6022%
4	State Income Tax Rate - Arkansas		6.50%	
5	Apportionment Factor	Note 2	7.88%	
6	Arkansas State Income Tax Rate	(ln 4 * ln 5)		0.5121%
7	Total State Income Tax Rate	(sum ln 3 & ln 6)	=	6.1143%

Note 1: The Oklahoma State Income Tax Rate of 6% can be reduced to 5.66% in years where credits are not available or offset tax. In 2007, a tax rate of 6% applies since all tax due was offset by credits. A deduction of Oklahoma State Income Taxes on the State Income Tax return cannot be taken when tax is not due because of offsetting credits.

Note 2: Apportionment Factors are to be based on most recent annual income tax filings as calculated in Parts II. & III. Below
